

# Moon-Leaves1 + Moon-Leaves2

design *Laudani & Romanelli*

Intervenire sulla natura con una consapevolezza nuova. Una tecnologia poeticizzata attraverso la forma. Grandi foglie in resina di polietilene luminescente che assorbono di giorno la luce del sole e la rilasciano di notte, regalandola alla luna.

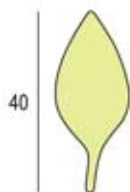

*Act on nature with a new consciousness. A technology that become pure poetry through the use of shapes. Big leaves made of luminescent polyethylene able to absorb the daylight and to release it during the night, giving it as a present to the moon.*
